As a Front-End Developer, I have a proven track record in creating engaging user interfaces for mobile applications. My experience at MCI equipped me with a comprehensive skill set in React Native. I also equipped myself with knowledge including ASP.NET, Flutter, Node.js, Django and IOT development. Additionally, I can work with various databases such as MS SQL Server, MySQL, PostgreSQL, and Firebase.

With existing experience. I want to become a fullstack developer within the next 2-3 years.
